

QUESTION:

How would you respond to proposals that limit access to Medicaid for Minnesotans?

Ask your candidate if they're committed to keeping the promise of Medicaid.

BACKGROUND:

For 50 years, Minnesotans have relied on Medicaid to provide health care, prescription drug coverage, and long-term care when it's needed most - through injury, illness, addiction, job loss, and much more.

Today, Medicaid (also known as Medical Assistance) protects more than one million Minnesotans, including children, parents, people with disabilities, lower wage workers, and seniors.

Recent proposals at the state and federal levels would limit this critical program through harmful funding reductions and reporting requirements.
